Introduction
Molecular biology discuss the chemistry of DNA, RNA and protein, chromosome, genome maintain, gene expression and its regulation. Students should learn the significance of molecular biology and its impact on human society

Outline
<ol style="list-style-type: none">1. Nucleic acids and genetic information2. Weak chemical reaction3. Weak and High energy bond4. Structures of DNA and RNA5. Chromosome, chromatin and nucleosome6. DNA replication7. DNA mutation and repair8. Homologous recombination9. Site specific recombination and transposition

Prerequisite
none
