

100-1 Preliminary Syllabus, Da-Yeh Univ

Information			
Title	環境工程實驗	Serial No. / ID	1403 / EVI3094
Dept.	環境工程學系	School System / Class	大學日間部3年1班
Lecturer	張玉明	Full or Part-time	專任
Required / Credit	Required / 1	Graduate Class	No
Time / Place	(一)567 / H808	Language	Chinese

Introduction
This is a unit operation laboratory class for environmental engineering. From personal operation experience, the students is trained a first hand experience with the unit operations and processes that are commonly used in environmental engineering.

Outline
Activated sludge RBC Jar test Column settling Cyclone Adsorption tower Bag filter Activated carbon adsorption Electrostatic precipitation

Prerequisite
courses covered previous semesters
