Time / Place	(一)789 / J211	Language	Chinese

Introduction

The purpose of the establishment of national park is to protect natural sceneries and resources. In addition, it can serve as a ground for the education of natural environments as well as the conservation and restoration of cultural relics. Since the establishment of the first national park of the world, Yellowstone National Park, in 1872, many countries have established their own national parks for their local features.

This course attempts to in detail introduce major national parks of the world, their highlight and location to the students for their background of ecological re c r e a t e ion in the future career.

Outline

1. A brief introduction of National Park
2. Definition of National Park
