Introduction
<p>The goal of this course is designed to develop students' academic writing abilities for their SSCI publication. Students are expected to read authentic articles written by prominent journal editors. Throughout the semester, the instructor will lecture the wide range of valuable tips such as writing an introduction, dealing with methodology, composing literature review, forming the results, and polishing the discussion section. This course is structured so that students have the opportunity to interact with their instructor and peers while working with their papers for future SSCI publication. In addition, students will have to actively participate in class, arguing a point of view in class while taking into consideration the views of others.</p>
