Introduction
This course is designed to deal with issues, phenomena, and areas of research that are on the borderline of the semantics and pragmatics of natural language, especially on the interface between semantics and pragmatics. Formal analyses will be of central interest here.

Outline
1. to provide students with an overview of the building blocks of applied linguistics and acquaint them with some of its recent developments of fundamental concepts. 2. to have a deeper understanding of the nature of applied linguistics and to know some techniques for applied linguistics analysis. 3. to apply insights from linguistic studies to improve language teaching and learning.

Prerequisite
Having a basic knowledge of the English language.
