Introduction
The aim is to familiarize students with quantitative research methods in social science so that students are able to plan, execute, and present their own empirical studies to fulfill their master thesis requirement.

Outline
The course is to help students learn how to conduct a quantitative survey research so that they can complete their master thesis without much hassle. It consists of introduction to scientific research in social sciences, research procedures, sampling, instrumentation, collection and treatment of data, presentation of results, discussion and implications of the research.

Prerequisite
None
