Introduction	
<p>This course introduces basic concepts and issues which are essential in the de s c r i p t i o n of the syntactic structure of languages and with which formal syntactic theories are concerned. Syntactic phenomena from a range of languages will be presented though emphasis would be on syntactic structures in English. Topics covered include phrase structure rules grammar and meaning lexicon and grammar and different types of syntactic phenomena such as relativization reflexivization causativization. Students will be familiar with basic syntactic concepts structures and develop a theory of grammar and have opportunities to exercise syntactic analyses and argumentation.</p>	

Outline	
<p>With two or three weeks as a cycle basic notions will be introduced first followed by discussions on syntactic (or morphological) structures. After grasping basic notions and having some ideas about the structure students will then analyze a syntactic problem.</p>
