

101-2 Preliminary Syllabus, Da-Yeh Univ

Information			
Title	演化設計解析	Serial No. / ID	2815 / DAR5095
Dept.	設計暨藝術學院碩士班	School System / Class	研究所碩士班1年1班
Lecturer	卓銀永	Full or Part-time	專任
Required / Credit	Optinal / 3	Graduate Class	No
Time / Place	(三)9AB / G108	Language	Chinese

Introduction

Architecture and industrial design are a general structure containing the life of human beings. This structure is changed and developed by design and high technology, leading the life of human beings richly. The development of architecture and industrial design according to social, cultural and technical advancement focuses on the sustainability through which architecture and industrial design can evolve along with the life of human beings, away from a simple change of types. The evolving design represents a process of maximizing efficient information management and integration throughout the whole fields of architecture and industrial design. The cross section of sustainable future architecture and industrial design patterns where life and technology are integrated as one beyond the existing morphological design is shown through this.

- Outline**
- 1: course explanation
 - 2: evolution is triumphal of concept
 - 3: evolving design is craftily history
 - 4: inside-outside
 - 5: transparency
 - 6: dissolving boundaries
 - 7: new spatial structure
 - 8: nested
 - 9: tradition-modernity
 - 10: nature, technology, materials
 - 11: new realities
 - 12: dynamics and floating
 - 13: eliminating gravity
 - 14: projects analysis
 - 15: project paper

Prerequisite

NO
