| Dept. | 生物產業科技學系 | School System / Class | 大學日間部1年2班 |
| Lecturer | 林宥彤 | Full or Part-time | 兼任 |
| Required / Credit | Required / 1 | Graduate Class | No |
| Time / Place | (五)567 / H626 | Language | Chinese |

| Introduction |
|--|
| General Chemistry Lab is a basic chemical technology curriculum to use the basic concepts of chemistry in order to manipulate the theoretical and experimental changes in the experiment so that students learn and understand the content and changes in chemistry. |

| Outline |
|--|
| 1. To help students develop the understanding of general chemistry experiment and interest |
| 2. To enhance the students the basic elements of general chemistry experiment to understand the content of the course topics |

| Prerequisite |
|---|
| With a high school chemistry background |
