Introduction
In this course, our aims were focused on the training of all student's experiment skills to learn the principles of biochemistry including sugars, lipids, proteins etc.

Outline
Color reactions of amino acids and proteins Identification of amino acids Quantification of proteins pI analysis for proteins General color reaction of sugars Identification of sugars Separation of glycogen determination of SAP value Effect of the lipids component on transudative of hydrophobic monolayer Enzymatic reactions determination of Michael-Menten constant Separation of plasmid DNA

Prerequisite
Basic biology and chemistry
