Introduction
To provide an understanding of principles of international finance to enable effective financial decision making in a multinational firm.

Outline
This course is designed to provide a comprehensive coverage of international finance topics. We will introduce the functions and operations of the foreign exchange and international money markets and discuss the underlying forces that move prices in these markets. Then discuss the analysis of the exchange rate risk problem of the international business firm and provide an in-depth analysis of various hedging strategies available to the multinational manager. Finally, will cover international equity markets and their potential benefit in providing international portfolio diversification.

Prerequisite
Finance
