Introduction

Computer is one of the important tools popularly used in this modern word. The ability of using softwares is especially essential for us. This course begins with the introduction of computer theory and combins with practices of softwares. The goal of this couse would like students to learn about basic concepts about hardware and software, and have skills in aplication of softwares. On the other hands, also hope to help students to pass TQC practical certification.

Outline

Basic concepts of hardware, Basic concepts of software, Introduction to bioinformatics resources, The DYU campus information system & electric databases, Introduction to Ms-Office & TQC, Microsoft Word, Microsoft Excel,Microsoft PowerPoint, TQC practice

Prerequisite
