| Title | LED製程技術 | Serial No. / ID | 2115 / EEI3128 |
| Dept. | 電機工程學系 | School System / Class | 大學日間部3年1班 |
| Lecturer | 王偉凱 | Full or Part-time | 兼任 |
| Required / Credit | Optinal / 3 | Graduate Class | No |
| Time / Place | (四)567 / H340 | Language | Chinese |

Introduction

This book is aimed diodes principle, process to explore a wide range of applications are in simple terms.

Outline

The book is divided into two parts, the first chapter to the fifth chapter describes the principles of light-emitting diodes and physical properties of the action; Chapter VI to Chapter VIII of the light-emitting diode system is illustrated in process technology and application; Also included semiconductor element attribute value introduction and chemical element symbols, physical constants.

Prerequisite

Students should have basic semiconductor physics, optical materials, LED principles and other related courses.
