Introduction
<p>This course examines the evolution of enterprise systems. This class studies the types of issues that managers will need to consider in implementing cross-functional integrated enterprise systems. We will examine the general nature of enterprise computing, re-engineering principles and the foundations of enterprise information architectures. The objective of this course is to make students aware of the potential and limitations of enterprise systems. This objective will be reached through case studies, lectures, guest speakers and a project.</p>
