

102-2 Preliminary Syllabus, Da-Yeh Univ

Information			
Title	製造與服務程序	Serial No. / ID	2316 / IEB1007
Dept.	工業工程與管理學系	School System / Class	進修學士班1年1班
Lecturer	王正賢	Full or Part-time	專任
Required / Credit	Required / 3	Graduate Class	No
Time / Place	(二)BCD / H507	Language	Chinese

Introduction
<p>The manufacturing industry is the foundation of national survival ,and the society depends on the manufacturing industry to c r e a t e e wealth . Recently , the domestic manufacturing technology has gradually tranformed from the traditional processing method to automation and precise . Therefore , our teaching goal of undergraduate courses is to train the students to have the basic conception of the factory ' s organization、 materials science 、 machinery and that of the automatic manufacture technology. In this way, students will have elementary knowledge to enter the manufacturing industry in the future .</p>

Outline
<ol style="list-style-type: none"> 1. Manufacture importance and manufacture organization 2. Manufacturing materials 3. Primary manufacture procedure : ferrous metal and heat treatment 4. Casting : tradition and modern 5. Metal plasticity shaping method 6. Cutting : basic theory , lathe , miller , drilling hole , twists hole , boring hole 7. Plastics 8. IC seal synopsis

Prerequisite
NO
