97-1 Preliminary Syllabus, Da-Yeh Univ

Information			
Title	有機化學(一)	Serial No. / ID	1696 / BRI2023
Dept.	生物資源學系	School System / Class	大學日間部2年1班
Lecturer	孫芳君	Full or Part-time	專任
Required / Credit	Required / 2	Graduate Class	NO
Time / Place	(<u></u>)34 / J306	Language	Chinese

Introduction

This course will introduce the basic content and principle of organic chemistry, including functional groups, naming and chemical reactions. It can provide the fundamental concepts to the students for further learning in the field of Life Science.

Outline

- 1.Introduction
- 2.Acid and base
- 3.alkane, alkene and alkyne
- 4. Alkane, alkene and alkyne
- 5. Haloalkanes
- 6. Haloalkanes
- 7.Alcohol, ether and thiol
- 8.Summary
- 9. Middle exam
- 10. Aldehyde and keto
- 11. Aromatic compound
- 12. Carboxylic acid
- 13. Carboxylic acid
- 14.Amine
- 15.Stereoisomers
- 16.Biological molecules
- 17. Summary
- 18.Final exam

Prerequisite

Chemistry
