Introduction
<p>In this course, we will examine fundamental aspects of interpersonal communication and consider how different types of computer-mediated communications (CMC) technologies such as e-mail, instant messaging, video conferencing, twitter and social network sites affect communication processes. The goals of the course are to provide students with a basic understanding of the processes of interpersonal communication, an understanding of how features of current CMC technologies affect interpersonal communication, and the knowledge they need to help design new communications technologies.</p>

Outline
<ul style="list-style-type: none">• Students will gain a theoretical understanding of the field of CMC and become familiar with both common and novel CMC tools, though readings and in-depth class discussion of key articles in the field.• Students will gain an understanding of how CMC researchers conduct their research, though a series of mini projects that require them to examine CMC phenomena and write short reports on them.• Students will gain an in-depth understanding of a selected area of CMC, through their team project and class presentation.

Prerequisite
N/A
