

98-2 Preliminary Syllabus, Da-Yeh Univ

Information			
Title	有機化學實驗	Serial No. / ID	1003 / BRI2094
Dept.	生物資源學系	School System / Class	大學日間部2年1班
Lecturer	黃新義	Full or Part-time	兼任
Required / Credit	Required / 1	Graduate Class	NO
Time / Place	(五)789 / J211	Language	Chinese

Introduction
This course will introduce the basic content and the principle of organic chemistry reactions. These experiments can train the students to familiar with the organic reactions and their chemistry skills.

Outline
1. Introduction
2. Introduction
3. Acid-base indicators
4. Recrystallization
5. Simple distillation
6. Extraction
7. Middle test
8. Introduction of reactions
9. Reaction of Alkenes
10. Reaction of Alkenes (summary)
10. Reaction of alcohol
11. Reaction of alcohol (summary)
12 Reaction of aldehyde and keto
13 Reaction of aldehyde and keto (summary)
14 Reaction of carboxylic acid
15. Reaction of carboxylic acid (summary)
16. Reaction of esters
17. Reaction of esters (summary)
18. Final test

Prerequisite
Chemistry
