

99-1 Preliminary Syllabus, Da-Yeh Univ

Information			
Title	奈米科技與材料導論	Serial No. / ID	1427 / MSI2012
Dept.	材料科學與工程學系	School System / Class	大學日間部2年1班
Lecturer	李弘彬	Full or Part-time	專任
Required / Credit	Optinal / 3	Graduate Class	No
Time / Place	(四)789 / H466	Language	Chinese

Introduction
This subject aims at helping engineering-background students of the project from the gradual progress of manufacturing technology, understand that the technological content of micro-nano material, including micro-nano material the scientific and technological principle of characteristic , the micro-nano material to measure and analysis , the processing and application of the micro-nano material.

Outline
introduction the scientific and technological principle of micro-nano material、 the micro-nano material to measure and analysis、 the method and prepare of micro-nano material

Prerequisite
Physics
