Dept.		School System / Class	3 5
Lecturer		Full or Part-time	
Required / Credit	Optinal / 3	Graduate Class	No
Time / Place	( )56 / H731 ( )56 / H727	Language	Chinese

Introduction

This course provides an application and design of programmable logic control systems. Lecture materials will convey the principles and practice for the control loops of process systems. Students will understand the fundamental elements and design technique through practices. The adequate ability to establish the electrical control systems in engineering applications will be developed.
