

## 97-1 Preliminary Syllabus, Da-Yeh Univ

| Information       |                                       |                       |                |
|-------------------|---------------------------------------|-----------------------|----------------|
| Title             | 程式設計                                  | Serial No. / ID       | 1598 / IEI2085 |
| Dept.             | 工業工程與科技管理學系                           | School System / Class | 大學日間部2年1班      |
| Lecturer          | 蘇慶良                                   | Full or Part-time     | 專任             |
| Required / Credit | Required / 3                          | Graduate Class        | No             |
| Time / Place      | (三)1 / H726 (四)12 / H727 (五)78 / H727 | Language              | Chinese        |

| Introduction                                                                                                                                                                                                                                                                                                                                                                                                                             |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>此課程介紹如何將資料寫入檔案, 下面的主題亦將於此課程中介紹: include, define, fprintf, fscanf, if else, switch case default, for, while, subroutine, *, &amp;, array and subroutine, point to point, structure.</p> <p>This course introduces how to write content to a file, include, define, fprintf, fscanf, if else, switch case default, for, while, subroutine, *, &amp;, array and subroutine, point to point, structure are introduced in this course.</p> |

| Outline                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
